This book constitutes the proceedings of the 21th Annual Conference on Research in Computational Molecular Biology, RECOMB 2017, held in Hong Kong, China, in May 2017. The 22 regular papers presented in this volume were carefully reviewed and selected from 184 submissions. 16 short abstracts are included in the back matter of the volume. They report on original research in all areas of computational molecular biology and bioinformatics

This book brings together leading academics and practitioners working in the area of language, gender, sexuality and education, consolidating recent developments and moving the field forward in a contemporary context. This unique and timely volume captures current themes, debates, theories and methods in the field, and will be of interest to scholars and practitioners working around the world in the areas of Applied Linguistics, Teaching English as a Foreign Language, Education, Sociology and Discourse Studies.

This book constitutes the thoroughly refereed post-conference proceedings of the International Conference for Smart Health, ICSH 2017, held in Hong Kong, China, in June 2017. The 18 full papers and 13 short papers presented were carefully reviewed and selected from 38 submissions. They focus on studies on the principles, approaches, models, frameworks, new applications, and effects of using novel information technology to address healthcare problems and improve social welfare.

Dieses Werk bietet eine eingehende Analyse der wichtigsten Debatten über Blockchain-basierte intelligente Verträge und Vertragsrecht. Nach einer detaillierten Beschreibung der Technologie werden die bestehenden Regeln zu Technologie und Verträgen - von Automaten bis hin zu berechenbaren Verträgen - untersucht und auf ihre Anwendbarkeit auf Blockchain-basierte Smart Contracts überprüft. Der Schwerpunkt liegt dabei auf den Auswirkungen von Blockchain-basierten intelligenten Verträgen auf das Zustandekommen des Vertrages, die Vertragserfüllung und das anwendbare Recht sowie die Gerichtsbarkeit.

This book constitutes the proceedings of the 21th Annual Conference on Research in Computational Molecular Biology, RECOMB 2017, held in Hong Kong, China, in May 2017. They report on original research in all areas of computational molecular biology and bioinformatics

This book is open access under a CC BY 4.0 license. This book offers a comprehensive guide, covering every important aspect of computational thinking education. It provides an in-depth discussion of computational thinking, including the notion of perceiving computational thinking practices as ways of mapping models from the abstraction of data and process structures to natural phenomena. Further, it explores how computational thinking education is implemented in different regions, and how computational thinking is being integrated into subject learning in K-12 education. In closing, it discusses computational thinking from the perspective of STEM education, the use of video games to teach computational thinking, and how computational thinking is helping to transform the quality of the workforce in the textile and apparel industry.

This is the book of abstracts for the Migration Conference 2020, 8 to 11 September. We ' re

pleased to welcome you to the 8th Migration Conference. The Migration Conference 2020 is held online via Microsoft Teams platform due to COVID-19 Pandemic restrictions. We have as usual covering a wide array of topics in this year ' s edition too. There are about 350 presentations and debates running over 4 days from 8th to 11th September 2020. We have tried to address the time zone differences by moving sessions towards mid-day and grouping presentations, where possible, according to time zones. However, we believe this is not perfect to accommodate hundreds of colleagues from Brazil to Japan, and Australia to Canada. PLEASE NOTE all times are GMT+1 British Summer Time (BST). MS Teams will normally show the times according to your computers local time. Our all-women keynote speakers line up this year features Nissa Finney, Jelena Dzankic, Martina Cvajner, Elli Heikkila, Agnes Igoe, and Helén Nilsson. Although the main language of the conference is English, this year we will have linguistic diversity as usual and there will also be some sessions in Spanish and Turkish. We thank all participants, invited speakers and conference committees for their efforts and contribution. We are particularly grateful to hundreds of colleagues who served as reviewers and helped the selection process.

The City of Manchester, once the birthplace of the 1st Industrial Revolution, is today a pioneering hub of the 4th Industrial Revolution (Industry 4.0), offering Industry 4.0 solutions in advanced materials, engineering, healthcare and social sciences. Indeed, the creation of some of the city ' s greatest academic institutions was a direct outcome of the industrial revolution, so it was something of a homecoming that the Sustainable Smart Manufacturing (S2M) Conference was hosted by The University of Manchester in 2019. The conference was jointly organised by The University of Manchester, The University of Lisbon and The Polytechnic of Leiria – the latter two bringing in a wealth of expertise in how Industry 4.0 manifests itself in the context of sustainably evolving, deeply-rooted cities. S2M-2019 instigated the development of 61 papers selected for publication in this book on areas of Smart Manufacturing, Additive Manufacturing and Virtual Prototyping, Materials for Healthcare Applications and Circular Economy, Design Education, and Urban Spaces.

This book constitutes the refereed proceedings of the 10th International Conference on Information Theoretic Security, ICITS 2017, held in Hong Kong, China, in November/December 2017. The 12 full papers were carefully reviewed and selected from 42 submissions. They are organized around the following topics: quantum cryptography; quantum information theory; post-quantum cryptography (e.g. lattices and cryptography); physical layer security; wiretap channels; adversarial channel models; cryptography from noisy channels; bounded storage models; network coding security; biometric security; randomness extraction; key and message rates; secret sharing; authentication codes; multiparty computations; information theoretic reductions; and implementation challenges.
