Henry Ford actually knew and liked a number of Jews who he knew in the particular. His neighbor Rabbi Leo M. Franklin and prominent Detroit architect, Albert Kahn come to mind. His dislike ran to the abstract concept of Jews operating within the stream of commerce, particularly those engaged in investment banking and agricultural product brokering.

How and why did this quintessential American folk-hero and pioneering industrialist become one of the most obsessive anti-Semites of our time—a man who devoted his immense financial resources to publishing a pernicious forgery, *The Protocols of the Learned Elders of Zion*? Once Henry Ford's virulent media campaign against the Jews took off during the "anxious decade" following World War I, how did America's splintered Jewish community attempt to cope with the relentless tirade conducted for ninety-one consecutive weeks in the automobile manufacturer's personal newspaper, *The Dearborn Independent*? What were the repercussions of Ford's Jew-hatred extending deeply into the 1930s? Drawing upon previously-uncited oral history transcripts, archival correspondence, and family memoirs, Neil Baldwin answers these and other questions, examining the

conservative biases of the men at the inner circle of the Ford Motor Company and disentangling painful ideological struggles among an elite Jewish leadership reluctantly pitted against the clout and popularity of "The Flivver King."

Henry Ford is remembered in American lore as the ultimate entrepreneur—the man who invented assembly-line manufacturing and made automobiles affordable. Largely forgotten is his side career as a publisher of antisemitic propaganda. This is the story of Ford's ownership of the Dearborn Independent, his involvement in the defamatory articles it ran, and the two Jewish lawyers, Aaron Sapiro and Louis Marshall, who each tried to stop Ford's war. In 1927, the case of Sapiro v. Ford transfixed the nation. In order to end the embarrassing litigation, Ford apologized for the one thing he would never have lost on in court: the

offense of hate speech. Using never-before-discovered evidence from archives and private family collections, this study reveals the depth of Ford's involvement in every aspect of this case and explains why Jewish civil rights lawyers and religious leaders were deeply divided over how to handle Ford.

The best lesson one can draw from this book is that being a great industrialist does not necessarily convey expertise in other subjects. The International Jew began as a four-volume set of pamphlets, published by Henry Ford in the 1920s, in which he attempted to justify his anti-Semitic views by couching his beliefs not as racism but as "fact." What follows is an unwieldy and meandering set of essays in which Ford uses pseudo-science and third-rate sociology (as well as talk of conspiracy and "ancient prophecy") in an attempt to scientifically prove that "the Jew" is the biggest problem

holding the world back. If something nice can be said about this book, it's that Ford is absolutely thorough in his accusations--perhaps an illustration of the kind of attention to detail that made him rise to such heights as a businessman. In his essays, he accuses the Jewish people of just about everything under the sun: fomenting Communism, gambling on baseball, making "Jewish Jazz" our national music, even conspiring with Benedict Arnold. Ford may have done as much as anyone in history to propel American industry into the future, but his anti-Semitic ramblings would have us stepping back into the Dark Ages.

"The Protocols of the Elders of Zion" is almost certainly fiction, but its impact was not. Originating in Russia, it landed in the English-speaking world where it caused great consternation. Much is made of German anti-semitism, but there was fertile

"The International Jew," by auto magnate Henry Ford, is comprised of newspaper articles printed in 'The Dearborn Independent' during the 1920's. At the apex of his business career Henry Ford sensed that a terrific effort was being made to take his business from him and manipulate it into the hands of the money-changers. Henry Ford, who had the impression that these manipulators were being engineered by powerful Jewish financiers, called to his office the most intelligent research men within his acquaintance. He commissioned them to make a thorough study of the International Jew and publish their findings in "The Dearborn Independent," which at

at that time was the official organ of the Ford Motor Company. No expense was spared, and it is estimated that literally millions of dollars were spent by Mr. Ford on this project. The original articles were carried first in "The Dearborn Independent," and then published in book form. This book, "The International Jew," provides a hard-hitting, easy-to-read introduction to what the renowned American automaker and industrialist called "the world's foremost problem." This influential and much-discussed collection of essays, packed with facts and insights, is an eye-opening survey of the enduringly vexing "Jewish question." Whether readers agree or disagree with the content of "The International Jew" and Ford's approach to the "Jewish question," the book provides an important historical record that remains of interest today.

Company ' s rise to become the largest, richest, and most influential corporation in the world, The Color Line and the Assembly Line takes on the traditional story of Fordism. Contrary to popular thought, the assembly line was perfectly compatible with all manner of racial practice in the United States, Brazil, and South Africa. Each country ' s distinct racial hierarchies in the 1920s and 1930s informed Ford ' s often divisive labor processes. Confirming racism as an essential component in the creation of global capitalism, Elizabeth Esch also adds an important new lesson showing how local patterns gave capitalism its distinctive features.

A compact, lively biography of Henry Ford, the brilliant businessman and icon of American modernity whose towering ego and anti-Semitism complicate his legacy.
