Hiab - world ' s leading provider of on-road load handling ...

Equipped with up to P ve hydraulic extensions the HIAB 200C reaches over 14 metres. The long reach is achieved while still keeping the boom system low in weight, this is due to the use of extra-high-tensile steel. The crane is delivered with manual control levers and SPACE 3000 intelligence. As an option your crane can be delivered with an XSDrive

Performance of Bio-based Building Materials provides guidance on the use of bio-based building materials (BBBM) with respect to their performance. The book focuses on BBBM currently present on the European market. The state-of-the-art is presented regarding material properties, recommended uses, performance expectancies, testing methodology, and related standards. Chapters cover both ' old and traditional ' BBBM since quite a few of them are experiencing a comeback on the market. Promising developments that could become commercial in the near future are presented as well. The book will be a valuable reference resource for those working in the bio-based materials research community, architects and agencies dealing with sustainable construction, and graduate students in civil engineering. Takes a unique approach to bio-based materials and presents a broad overview of the topics on relevant areas necessary for application and promotion in construction Contains a general description, notable properties related to performance, and applications Presents standards that are structured according to performance types

"The rise and fall of kings and nations!"--Cover.

The Contract Specialist Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

From seed catalogues to greenhouses, public gardens to horticultural societies, you'll find information and sources for everything you need, conveniently organized by location.
