Art History Professor extensively theorized through the 1980s and 1990s, has reached a new technosensual comfort zone in the early twenty-first century. In *Sensorium*, contemporary artists and writers explore the implications of the techno-human interface. Ten artists, chosen by an international team of curators, offer their own edgy investigations of embodied technology and the technologized body.

Sensorium: Embodied Experience, Technology, and ...

The impact of new technology has reshuffled the established hierarchy of the senses and radically changed people's lives. Remote sensing via telephones and screens are fundamental parts of the daily sensorium (a Latin term that connotes ancient and often theological debates about mind and body, word and flesh, human and artificial).
