Signs That Locking Hubs Are Bad - It Still Runs

Locking hub were invented to engage/disengage the front wheels from the front axle shafts. Idea was to keep parts that were not needed in 2WD mode from rotating in order to reduce mechanical drag and thus save gas. Good idea but the savings are extremely minimal. A proposed additional benefit of locking hubs is less wear and tear of front axle parts.

locking hubs - to lock or not to lock, how to use manual---

They are manual rather than auto locking hubs, because manual are much more reliable, and you can engage them while stopped. The front and rear wheels have to be spinning the same speed to engage auto locking hubs, so if you are stuck in the snow, the front wheels won't be spinning and can't engage.
